

« Four Unicorns in the Race for a mRNA-based Vaccine against Covid-19 »

BioNTech, CureVac, Moderna Therapeutics, Translate Bio.... These four biotech are the main state-of-the-art companies at the forefront in mRNA science. **All of them** are now developing **mRNA-based vaccine candidates against SARS-CoV-2** and **have reached the clinical stage**.

These programs could lead to short-term boosts for these companies's shares. However, addressing epidemics is still a risky business. So far, it isn't the most profitable area for companies and decision makers in health, industry and politics need a comprehensive overview of their businesses. Let's find out main assets and strengths of these companies in our latest report « **Four Unicorns in the Race for a mRNA-based Vaccine against Covid-19** »
